Business Review of Edmonton

In this edition of The Bulletin you will find many writeups of progressive firms, who, supporting a local payroll, are helping to turn the wheels of progress and bring conditions back to normal. They have confidence in Edmonton and district's ability to recover her former good times, and are taking this method to let their many friends and customers know that the so-called depression has not affected their confidence. Discretion was used in reviewing only those firms who are leaders in their line of endeavor. These articles were prepared by competent newspapermen of the Guyer Press Association from data obtained from the city as a whole. Read them carefully.
